## Asthma care plan for education and care services

CONFIDENTIAL: Staff are trained in asthma first aid (see overleaf) and can provide routine asthma medication as authorised in this care plan by the treating doctor. Please advise staff in writing of any changes to this plan.

To be completed by the treating doctor and parent/guardian, for supervising staff and emergency medical personnel.

#### **PLEASE PRINT CLEARLY**

Child's name

Date of birth

Photo of child (optional)

**Plan date** /201

**Review date** /201

#### Managing an asthma attack

Staff are trained in asthma first aid (see overleaf). Please write down anything different this child might need if they have an asthma attack:

Daily asthma management				
This child's usual asthma signs	Frequency and severity			Known triggers for this child's asthma (eg
Cough	Daily/most days		(	exercise*, colds/flu, smoke) — please detail:
Wheeze	Frequently (more th	nan 5 x per year)		
Difficulty breathing	Occasionally (less th	nan 5 x per year)	-	
Other (please describe)	Other (please descr	ibe)	-	
Does this child usually tell an adult if s/he is havi	ng trouble breathing?	🗌 Yes	🗌 No	)
Does this child need help to take asthma medication?		Yes	🗌 No	5
Does this child use a mask with a spacer?		Yes	🗌 No	)
*Does this child need a blue reliever puffer medi	ication before exercise?	Yes	🗌 No	0

#### **Medication plan**

Other (please of	describe)	Other (please desc	cribe)		
Does this child usu	ally tell an adult if s/he i	s having trouble breathing?	Yes	] No	
Does this child nee	ed help to take asthma n	nedication?	Yes	] No	
Does this child use	a mask with a spacer?		Yes	] No	
*Does this child ne	eed a blue reliever puffer	medication before exercise?	Yes	] <b>No</b>	
Medication plan					
If this child needs a	asthma medication, plea	se detail below and make sur	e the medication and sp	acer/mask are supplie	d to staff.

# Asthma First Aid

#### Sit the person upright

- Be calm and reassuring
  - Do not leave them alone

### Give 4 separate puffs of blue/grey reliever puffer

- <u>Shake</u> puffer
- Put <u>1 puff</u> into spacer
- Take <u>4 breaths</u> from spacer

Repeat until <u>4 puffs</u> have been taken

Remember: Shake, 1 puff, 4 breaths

OR give 2 separate doses of a Bricanyl inhaler (age 6 & over) or a Symbicort inhaler (over 12)

## Wait 4 minutes

 If there is no improvement, give <u>4 more separate puffs of</u> <u>blue/grey reliever</u> as above

OR give 1 more dose of Bricanyl or Symbicort inhaler

## If there is still no improvement call emergency assistance - Dial Triple Zero (000)

- Say 'ambulance' and that someone is having an asthma attack
- Keep giving <u>4 separate puffs</u> every <u>4 minutes</u> until emergency assistance arrives

OR give 1 dose of a Bricanyl or Symbicort every 4 minutes - up to 3 more doses of Symbicort

#### Call emergency assistance immediately - Dial Triple Zero (000)

- If the person is not breathing
- If the person's asthma suddenly becomes worse or is not improving
- If the person is having an asthma attack and a reliever is not available
- If you are not sure if it's asthma
- If the person is known to have Anaphylaxis follow their Anaphylaxis Action Plan, then give Asthma First Aid

Blue/grey reliever medication is unlikely to harm, even if the person does not have asthma
